DETAILED ACTION

Allowable Subject Matter

1. Claims 1-17, 19-20, 22-23 and 25-29 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior arts of record fail to teach or suggest a holding device as cited in the claims of the instant application.
3. The closet prior arts, Schreyer et al. (U S Patent No. 7,175,153), and Vappula (U S Patent No. 7,021,601) fail to teach or suggest the holding device is formed by a shuttering device comprising an opening through which a lever protrudes inwardly, the lever being operable from outside the shuttering device for transferring the magnet from its locking position to its detach position, and wherein in the detach position, the magnet protrudes from the opening of the shuttering device at least by sections as cited in claim 1 of the instant application; the magnet being mounted so as to be rotatable about a swivel pin to be transferred from the locking position to the detach position such that it is arranged in a swivel manner in the detached position with respect to the locking position as cited in claims 1 and 27-29 of the instant application; a locking means holding the magnet in the detach position, wherein the locking means comprises a magnetizable or magnetic section that is operatively connected to the magnet so as to magnetically act upon it

for holding the magnet in the detach position as cited in claim 27 of the instant application; the locking means is dimensioned such that a magnetic force between the locking means and the magnet is slightly larger than a restoring moment generated at least by a weight of the magnet and forcing the magnet into the locking position as cited in claim 28 of the instant application; and a locking means holding the magnet in the detach position, wherein in the detach position a major part of the magnet is arranged between the swivel pin and the locking means as cited in claim 29 of the instant application. Nor does there appear to be any reason in these references, or combined with any of the other prior art of record, to modify the holding devices to result in such a combination of features.

4. Claims 7, 9-11, 13 and 27-29 are examined under 112, 6th paragraph due to the use of the “locking means”, without specific structure and claim 12 is examined under 112, 6th paragraph due to the use of “actuation means”.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
